**Nezkot's Next Gen Manufacturing Centre gets a Million Dollar Boost**

Nezkot is thrilled to announce that it has been awarded a Sovereign Industrial Capability Grant to deliver next generation manufacturing capability.

“We are a growth focused, technology driven advanced manufacturing company. We began a strategic investment in world class capabilities several years ago, and this latest investment will see us continue to provide innovation and competitive advantages into our customers’ supply chains for many years to come.” Adrian Sansonetti, Head of Aerospace & Defence, said.

“This investment will enhance our value proposition, further strengthening our ability to deliver mission critical parts for defence. This capability is a key component in supporting a range of major Aerospace & Defence programs moving forward, including Land 400, Sea 1000 & Sea 5000.”

Under the agreement, Nezkot will partner with German powerhouse machine tool builder DMG Mori to deliver a suite of equipment that includes 5 Axis Machining Centres and Mill Turn Machines, providing outstanding capability, world leading technology, and comprehensive back up and support.

The project will be delivered by early 2020.
